EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This communication is an Examiner's reasons for allowance in response to application filed on January 23, 2004, assigned serial 10/763,629 and titled "BRAKE BOOSTER VACCUM SENSOR DIAGNOSTIC".

2. The following is the Examiner's statement of reasons for the indication of allowable subject matter:

a. After carefully reviewing the application in light of the searches of all the possible areas relevant to the present application, a set of related prior art references has been found, but those prior art references are not deemed strong to make the application unpatentable. Thus, it is found that the application is now in condition for allowance.

b. Although the prior art disclose several claimed limitations, none of the references teaches a diagnostic system for a brake booster sensor which includes a monitor for monitoring a maximum error and a minimum error based on a brake booster sensor signal over a monitoring period, and a comparator for determining one of a pass status and a fail status of the brake booster sensor based on the maximum error and the minimum error (claims 1, 11 and 16), wherein the maximum error is the maximum difference between an engine vacuum and a brake booster vacuum, and the minimum error is the minimum different between the engine vacuum and the brake booster vacuum occur within the monitoring period (claim 17). Also, neither reference teaches the determination of pass or fail based on the comparison between the error reduction fraction ERF and a threshold (claims 4, 5), wherein the EFF based on the maximum error and the minimum error (claim 2). Furthermore, none of the references recites the maximum error and the minimum error are generated when the engine vacuum is larger

Art Unit: 3661

than the brake booster vacuum and the throttle position is less than a throttle position minimum within the monitoring period (claims 6-10 and 12).

c. The closest references found are Isono et al. (6,289,271) and Allen et al. (2005/0172934) but none of these recites the limitation as in claims 1, 11 and 16 the present application.

d. Claims 1-25 are allowable over the prior art of record.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM

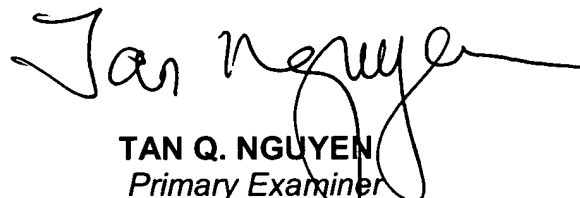

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black, can be reached on (571) 272-6956.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to the Central Fax: (571) 273-8300.
